

The 10th China-Korea-Japan Workshop for young architects 2018

■ Purpose

The three institutes of China, Korea and Japan execute the workshop to boost interaction and improvement of relationship with members over the countries and share the architectural thoughts, visions and information through young architects.

As helping boost rural vitalization in China. This workshop has goals to establish a villager center through the form of reconstruction and expansion to meet the needs of village committee offices, villagers activities, cultural displays, and agricultural and sideline products display, tourist services and other complex functions.

■ Workshop Theme: Rural vitalization: A new villager center of “Mutouwo village”

The village of Mutouwo, located in Ninghe district, Tianjin, China. Its villagers, like the most villages in China, most of them are relocated to other big cities. Some areas and houses are abandoned and in a very poor conditions. Its “villager center” is no longer meet the needs for future development. The goal of the workshop is to design a new functional complex "villager center" through rational distribution.

■ Subject Description

Site: Tianjin, Ninghe district, Lianzhuang town

Area: About 10000 m² (about 5000 m² is swag)

Conditions:

- The design type (renovation, addition etc.), structural type, space program and size can be suggested arbitrarily.
- Should consider the natural site conditions of the village, the compound function of the building and the internal use of the site.
